TECHNICAL SKILLS

Languages
JavaScript, Python, SQL (basic)

Fundamentals
Object-oriented programming basics; arrays, searching and sorting algorithms

Frontend
HTML, CSS, React.js, Tailwind CSS, Redux Toolkit, React Query

Backend
Node.js, Express.js, FastAPI, REST APIs, JWT Authentication

Databases
PostgreSQL, MongoDB, Redis, pgvector

Tools
Git, GitHub, Postman, SQLAlchemy, Alembic, Axios

AI Tools
Cursor, Antigravity, Claude Code, OpenAI Codex, Nemotron, Groq, Lovable, Rocket

EDUCATION

B.Tech, Computer Science
Dr. A.P.J. Abdul Kalam Technical University, Lucknow
2021 – 2025

Class XII – 74%
Sarvodaya Bal Vidyalaya, Delhi
2020 – 2021

AAYUSH BHADULA

FULL STACK DEVELOPER

SUMMARY

Computer Science graduate (B.Tech, 2025) with hands-on experience building and debugging full-stack web applications through an internship and a live freelance project. Comfortable with JavaScript, Python, REST APIs, SQL and NoSQL databases, and Git. Enjoy tracing bugs to their root cause and picking up new tools quickly. Keen to learn new technologies and continuously develop my skills to stay aligned with evolving industry needs.

EXPERIENCE

Freelance Full Stack Developer Sep 2026 – Present
Sara Creation Decor | Delhi, India

- Building and maintaining a live e-commerce website for a handcrafted home decor business using React.js, Node.js, Express.js, MongoDB and Tailwind CSS.
- Developed customer and admin features for product catalog, inventory, orders, checkout and login, using REST APIs with JWT-based access control.
- Integrated Razorpay for payments, Shiprocket for shipping, Cloudinary for images and Resend/Brevo for transactional emails.
- Deployed and maintain the site on Vercel, Render and MongoDB Atlas with a custom domain; work on page speed, image loading and basic SEO.

Full Stack Intern Dec 2025 – May 2026
AventIQ (Mittal Software Labs Limited) | Delhi, India

- Built reusable React components and connected them to REST APIs for logistics modules.
- Wrote backend APIs in Node.js and Express.js for inventory and pricing workflows.
- Debugged and fixed production bugs, and improved performance by optimizing API responses.

PROJECTS

PDF Chat AI (In Progress) GitHub
React, FastAPI, PostgreSQL, pgvector, Redis, Gemini, Groq

- Building a document assistant where users upload PDFs and ask questions about them, using Retrieval-Augmented Generation (RAG).
- Async backend in Python with FastAPI and SQLAlchemy; PostgreSQL with pgvector stores embeddings for semantic search; Alembic for schema migrations.
- Implemented JWT login with bcrypt password hashing and Redis caching; supports both Gemini and Groq models.

We Three Food Stuff Trading Platform
React.js, Node.js, Express.js, MongoDB, Redis, Redux Toolkit, React Query

- Built a B2B commodity trading and logistics platform covering freight pricing, ports and incoterms.
- Designed and implemented 15+ REST APIs for supply-chain modules and 20+ reusable React components for admin dashboards.
- Added bulk CSV/Excel import using Node.js streams, Papaparse and ExcelJS to handle large data files.
- Used Redis caching and React Query to speed up data loading; secured APIs with JWT and role-based access control.

Movie Ticket Booking App GitHub
MERN Stack, PayPal API

- Built a ticket booking app with movie browsing, theater discovery and seat booking.
- Used geolocation to show nearby theaters and show timings.
- Added seat selection with availability checks, and integrated PayPal for payments.
